Introduction

The NodeMCU is an open-source firmware and development kit that helps you to prototype your IoT product within a few lines. For more details, please visit

Feature

Open-source

- Interactive
- Programmable
- Low cost
- Simple
- Smart
- WI-FI enabled

Ard-duino-like hardware IO

Advanced API for hardware IO, which can dramatically reduce the redundant work for configuring and manipulating hardware.

- Code like ard-duino, but interactively in Lua script.

Nodejs style network API

Event-driven API for network applications, which facilitates developers writing code running on a 5mm*5mm sized MCU in No style.

- Greatly speed up your IOT application developing process.

Lowest cost WI-FI

Less than \$2 WI-FI MCU ESP8266 integrated and easy to prototyping development kit.

- We provide the best platform for IOT application development at the lowest cost.
